

REVOLUTION

PERFORMANCE UNDER PRESSURE

REVOLUTION

The Revolution® is the first in the Desert Fog® series of humidification products developed by Fogco Systems, Inc. to improve the performance of a high pressure fog system. This unique fan design provides for a vented horizontal air stream just below the fog nozzles. This air stream will carry the droplets 360 degrees away from the fan allowing for increased coverage of the system, improved absorption of the moisture, and uniform distribution of the fog.

APPLICATIONS

- Greenhouses
- Printing
- Paper products
- Wood working
- Electronics
- Textiles
- Clean rooms
- Hospitals

SPECIFICATIONS

- a fraction of the operating cost of traditional basket fans
- provides 360 degree distribution of the fog
- covers up to 2500 square feet
- low operating noise level
- available in 115V/230V and 50Hz/60Hz
- 1.8 amps at 115V
- 2100cfm
- includes a 10 nozzle stainless steel fog ring
